Wholesale
Catalogue *of Palms, etc.*
TO THE
Trade Only.

The United States Nurseries,

SHORT HILLS,
New Jersey,
U. S. A.

European Branch,
HEXTABLE,
SWANLEY, KENT,
England.

Cable Address,
Pitcher, New York.

Cable Address,
Manda, Hextable.

JANUARY, 1891.

THE United States Nurseries are situated in Short Hills, N. J., on the D., L. & Western R. R., only seventeen miles from New York City. Frequent trains leave from foot of Christopher or Barclay street.

For time table see below.

The European branch is situated at Hextable, Swanley, Kent, England.

We are pleased to see visitors at any time. A personal visit will facilitate selection of plants and afford an opportunity of seeing the extent of our Nurseries.

TERMS: Accounts are made up monthly. Our patrons are requested to remit by checks, express, or P. O. Money Orders or currency in registered letters, as we can not be responsible for moneys sent in unregistered letters. From **UNKNOWN** correspondents either a remittance or reference is requested with each order.

NO CHARGES are made for boxes, packing or delivery to the railroad or express office. All plants are carefully packed and may be forwarded safely to any part of the globe.

ORDERS are solicited at as early a date as possible, that we may have ample time for their execution. Please write plainly Name, Post Office, Express Office, and any other necessary information as to the best method of forwarding.

ADVICES OF SHIPMENT, together with the invoice, are sent the same day goods are forwarded.

COMPLAINTS, if any, should be made on receipt of goods; we promise prompt and just treatment of all claims presented. (We guarantee safe arrival of Plants sent by Express, but can not be responsible for plants sent by Freight.)

HEAD GARDENERS AND ASSISTANTS. We have on our register names of several practical and trusty men for above positions, and will be happy to recommend them to any lady or gentleman requiring their services.

TIME TABLE:

Trains from New York leave Christopher or Barclay Street Ferry

7:30, 8:40, 10:10, 11:10 A. M.

1:30, 2:30, 4:00, 4:30, *4:30, *5:20, 5:40, *6, 6:10, 6:30, 8:00, 9:15, 10:15, 11:30

JANUARY 1891.

Preface.

In presenting our wholesale catalogue to the trade, we beg to thank our customers heartily for their kind recommendations and past commands, and hope to be favored with a fair share of their esteemed orders in the future.

With our extensive establishments at Short Hills, N. J., and Swanley, England, we are enabled to offer to the trade the fine collection of plants shown in this catalogue, at the lowest prices consistent with the best quality. Receiving as we do almost every day of the year importations from their native habitats of Orchids, etc., etc., we are able to do this with success.

Our specialties for which we are already famous, are Orchids, Cyripediums, Hardy Perennials, Palms, Foliage Plants and Chrysanthemums, and we are the acknowledged head-quarters for these. We publish periodically retail catalogues for the following; Orchids, Cyripediums, Chrysanthemums and Hardy Perennials. Descriptive editions of these are now in course of preparation, and will be mailed on application to the trade, to whom a liberal discount will be allowed.

Cut flowers of Orchids may be had at all times of the year by the box, or in separate quantities at reasonable rates.

We refer you to the headings over each specialty in this catalogue.

A small pamphlet on the practical culture of Orchids is ready and will be mailed on application.

There is a standing rule in our firm, that every plant which goes out of our establishment must be true to name. Never substitute. This rule is strictly adhered to.

Our packing is unique, as hundreds of testimonials can testify.

You are cordially invited to visit the Nurseries at any time, where a hearty welcome will be accorded you.

Respectfully,

PITCHER & MANDA.

P. S.—Write for Catalogue of New and Rare Plants, which is now ready.

CYPRIPEDIUMS.

It is a well known fact that Cyripediums are the easiest grown Orchids, and that their flowers last longer than any other flower known. This is a great recommendation as a cut flower.

The colors are rich and pleasing, and combine well with roses and fine ferns, in fact with anything that they are used with; while if a basket or vase is filled with Cyripediums alone, a unique effect is produced.

For description and culture write for our Orchid Book which is free on application.
